CDVI Group Company

SUBLIM Digicode® Innovation 2008

RANGE : Digicode®

High-tech Digicode® innovation

This new keyless Digicode® keypad integrates a revolutionary technology based on sound analysis. Very small sensors (placed on almost any type of material) identify the location of a sound, and translates it into a digital key press. No more mechanical keys.....

This innovative technology and high-tech design creates many opportunities for use in special environments such as architect-designed sites, very prestigious buildings and environments where futuristic technology is appreciated. Despite it's design and technology features, the keyless Digicode still offers a high level of security for the user.

Digicode®

SUBLIM

Technical specification

- Polycarbonate and stainless steel keypad
- Audible and visual feedback
- 1 relay output (optional 3 outputs)
- Exit button inputs (for relays 1 and 2)
- Coaxial cable
- Free voltage:
 - 12 to 24 Vac
 - 12 to 48 Vdc

Product features

- *Keyless operation*
- *Hi-Tech Design*
- *Illuminated keypad*
- *Digits laser-engraved*
- *Electronics housed remotely*
